FOREIGN AGRICULTURAL TRADE OF THE UNITED STATES, CALENDAR YEAR 1995 SUPPLEMENT.
Commercial Agriculture Division, Economic Research Service, U.S. Department of Agriculture.

ABSTRACT

This statistical reference summarizes current and historical data on U.S. foreign trade in agricultural products. Tables highlight commodity and country information, including values, quantities, principal markets for agricultural exports, and import sources.

Note to Subscribers

The Economic Research Service (ERS) will publish the Foreign Agricultural Trade of the United States (FATUS) quarterly, instead of bimonthly, and fiscal and calendar year supplements. The data published in the January/February/March issue will include calendar year totals; the April/May/June issue, data from the first 6 months of the fiscal year; the July/August/September issue, 9 months of fiscal year data; and the October/November/December issue will include fiscal year totals.

The export and import data files (tables A-2 and B-3 in the FATUS publication) are available each month on the CALL-ERS/NASS electronic bulletin board. Set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229, or 1-202-219-0377 to access the bulletin board. Log on as a new user and follow the instructions. The tables are self extracting archives which are decompressed by typing the file name at the command prompt. The data files are available on ERS' homepage on the Internet. The Internet address is http://www.econ.ag.gov/. The files are located under Electronic Publications-Situation and Outlook Reports-U.S. Agricultural Trade.

ERS plans to phase out the printed issues of FATUS and merge FATUS and U.S. Agricultural Trade Update into a single subscription in 1997. Subscribers will receive the monthly newsletter, and have electronic monthly access to the FATUS data files, and the fiscal and calendar year supplements. Special articles, such as State export shares and export share of production, will be summarized in the monthly Update and made available electronically.

SPECIAL NOTICE

This statistical report presents tables showing current and historical data on U.S. foreign trade in agricultural products. Commodity and country information is for the most recent 2-year period. Statistics for calendar year 1995 are preliminary.

U.S. foreign agricultural trade statistics in this report were derived from official data released by the Bureau of the Census. Agricultural commodities are defined as (1) nonmarine food products and (2) other products of agriculture, including fibers, raw hides and skins, fats and oils, and beer and wine, which have not passed through complex processes of manufacture. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such by the U.S. Customs Service.

Trade statistics for selected nonagricultural products, including fertilizer, fish, agricultural chemicals, farm machinery, and manufactured tobacco, are presented at the end of the commodity group tables.

Exports

Export data include "exports of domestic merchandise," defined as commodities grown, produced, or manufactured in the United States, and commodities of foreign origin that have been changed from the form in which they were imported. The export value is generally equivalent to a free-alongside-ship (f.a.s.) value at the U.S. port of export, based on the transaction price and including inland transportation, insurance, and other costs. Agricultural exports have been adjusted for transshipments through Canada based on information provided by the Federal Grain Inspection Service. More than 500 revisions have been incorporated into the 1994 and 1995 tables.

Imports

Import data are "imports for consumption," which include entries for immediate consumption and withdrawals from bonded Customs warehouses. The import value is defined as the "Customs value," based on the foreign market value, export value, or constructed value, and excludes import duties, freight, insurance, and other charges incurred in moving the commodity to the U.S. port.
